THE CENTER FOR REGIONAL STUDIES

The Center for Regional Studies was established by the Board of Regents of The University of Kansas in 1965 for the general purpose of contributing toward a better understanding of the process of regional growth and development. While primary attention is to be focused on the State of Kansas, the aim is to provide information which is beneficial to other regions as well.

Through the Center's research efforts, useful information will be made available to interested persons involved in agriculture, business, education, government, and labor in order that they might have a more factual basis upon which to make planning decisions.

FOREWORD

As regional economic and social statistics become more prevalent so do the number of sources disseminating such information. The utility of these statistics depends to a great extent on an awareness of the various sources containing them and their accessibility. Often, even under the best of conditions, it is difficult to know if and where particular regional statistics exist.

The purpose of this volume is to present in a concise and convenient form important social and economic data pertaining to the State of Kansas. These data have been obtained and compiled from a number of different sources. Their potential usefulness should be increased as a result of consolidating them into one volume.

The objective, at the present time, is to make available the *Kansas Statistical Abstract* on a continuing basis. Revisions shall be made in an effort to reflect the most current information available about the State.

A great deal of credit should be given to Mr. Charles Heath for his conscientious efforts in gathering and compiling the data presented in this volume. In addition, Mrs. Joyce Miller is to be commended for her diligent efforts in typing and editing the tables.

To Users of the
Kansas Statistical Abstract

The staff of the Center for Regional Studies is to be congratulated for their efforts in compiling the data in this Abstract. Governmental officials, journalists, students, and interested citizens will find this an invaluable source of basic social and economic data on Kansas.

The value of such data is frequently related directly to its accessibility. Anyone who has searched through volume upon volume of census material or looked furtively through old newspapers for an isolated but essential piece of information will appreciate the usefulness of this compendium.

As other states follow the example set here, I am sure the use of this volume will grow rapidly.

Sincerely,

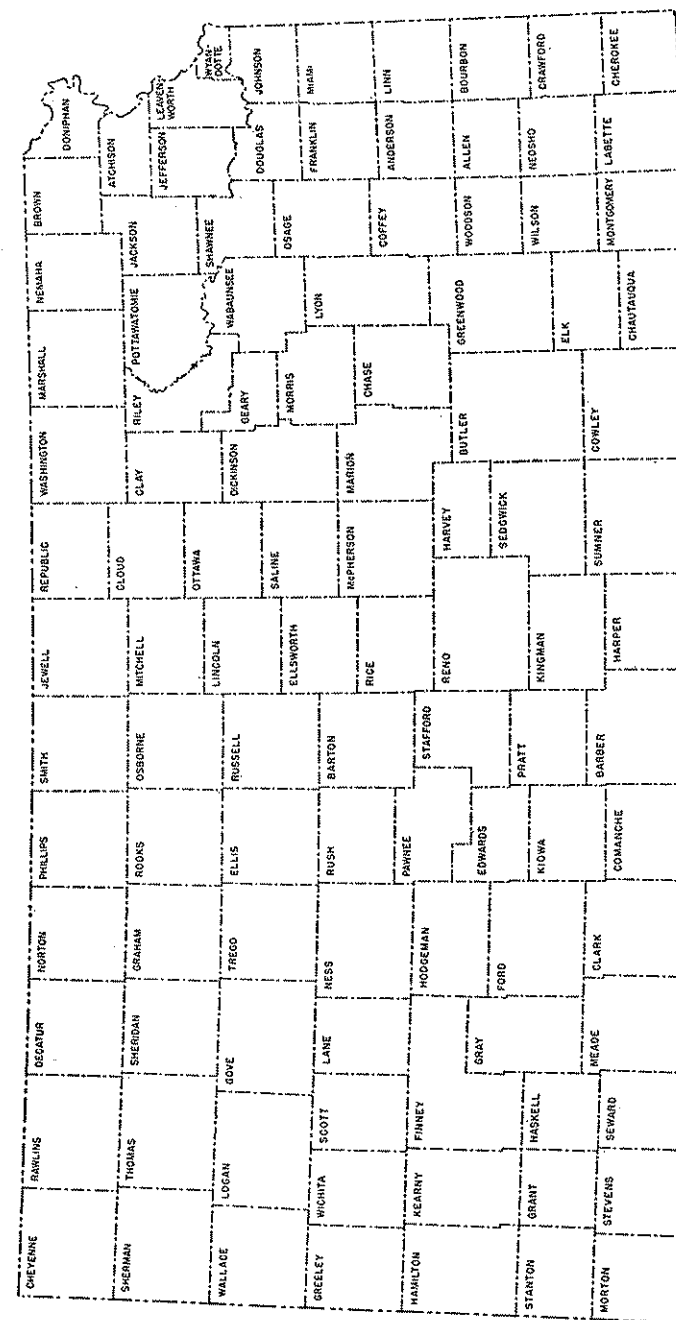

A handwritten signature in cursive script that reads "Wm. H. Avery".

Bank debits are "..... debits to deposit accounts except interbank accounts. More specifically they include debits at reporting commercial banks, member and nonmember, to deposit accounts of individuals, partnerships, corporations, the United States Government, and State and local governments. The figures include debits to time and saving accounts, payments from trust funds on deposit in the banking department, and the payment of certificates of deposit. The figures exclude payments of certified and officers' checks, payments in settlement of clearing-house balances, charges to expense and miscellaneous accounts, corrections and similar charges, and debits to the accounts of other banks, that is, to 'interbank debits'."

* The excess of farm acreage over approximate land area is due to the fact that the entire acreage of a farm is tabulated as in the county in which the headquarters is located, even though a part of the farm may be situated in an adjoining county.
