\* Value added by manufacture for 1982 is computed using inventory data reported at cost or market prior to any adjustment to LIFO cost. This uniform instruction is a change from prior years in which respondents were permitted to value their inventories using any generally accepted accounting method. Consequently, 1982 data for value added by manufacture are not comparable to prior year data.

<sup>1</sup> Payroll, employment, and sales data for some small single-unit companies with up to 20 employees (cutoff varied by industry) were obtained from administrative records of other government agencies rather than from census report forms. These data were then used in conjunction with industry averages to estimate the items shown for these small establishments. This technique was also used for other establishments whose reports were not received at time data were tabulated. The following symbols are shown where estimated data account for 10 percent or more of figures shown: E1-10 to 19 percent; E2-20 to 29 percent; E3-30 to 39 percent; E4-40 to 49 percent; E5-50 to 59 percent; E6-60 to 69 percent; E7-70 to 79 percent; E8-80 to 89 percent; E9-90 percent or more.

<sup>2</sup> Includes establishments with payroll at any time during year.

<sup>3</sup> Statistics for some industry groups and industries are withheld to avoid disclosing data for individual companies. However, for such industry groups and industries with 150 employees or more, number of establishments is shown and employment size range is indicated by one of the following symbols: AA--150 to 249 employees; BB--250 to 499 employees; CC--500 to 999 employees; EE--1,000 to 2,499 employees; FF--2,500 employees or more. Statistics for industry groups shown include data for all component industries, regardless of whether data are shown for individual industries in the group.

<sup>4</sup> Aggregate of cost of materials and value of shipments includes extensive duplication, since products of some industries are used as materials by others.

(D)-Withheld to avoid disclosing data for individual companies.

Note: Census figures for 1980 and 1990 were used for FY80 and FY90. 1981-89 are population estimates provided by the U.S. Census Bureau. 1990 Census figures were used in calculation of FY 1991 Pull Factor.

\*Pull Factor = County per capita sales tax/state per capita sales tax. A pull factor which is higher than 1.0 indicates that the county is attracting business; a pull factor which is less than 1.0 indicates the county is losing business.
