* - Formerly known as the Scholastic Aptitude Test.

** Possible scores on each part of the SAT range from 200 to 800. Rankings of states based on SAT scores alone are invalid because of the varying proportions of students in each state taking the tests.

Figures are based on sales tax collections as reported in the KDOR Annual Report and listed in fiscal years. Nominal sales are calculated by dividing the sales tax collection amount from each county by the state sales-tax rate. From nominal sales, real sales are found using the averaged CPI-U for the Midwest region, as reported by the Bureau of Labor Statistics. Compiled by PRI.

*Average Per Farm is obtained by dividing Total Value of All Farmland by the number of farms. r-revised
 Note: Beginning in 1975, a farm is defined as any place with annual sales of agricultural products of \$1,000 or more. Between 1959 and 1975 a farm was defined as a place of 10 or more acres that had annual sales of agricultural products of \$50 or more or a place of less than 10 acres that had annual sales of \$250 or more. Prior to 1959 a farm was defined as a place three acres or more in size with a value of farm products amounting to \$150 or more. Places of less than three acres with sales of \$250 or more were also considered farms.
