FOREWORD

The Thirty-sixth Edition of the *Kansas Statistical Abstract* contains data collected through November 2002 for eighteen different categories of information: Agriculture, Banking, Business and Industry, Climate, Communications, Crime, Education, Elections, Employment and Earnings, Energy, Government, Housing and Construction, Income, Mining, Parks and Recreation, Population, Transportation, and Vital Statistics and Health.

For the first time in the thirty six years that the *Abstract* has been produced, no bound copy will be available; instead, all of the tables can be accessed on the Policy Research Institute's Web site, in a pdf file:

<http://www.ku.edu/pri/ksdata/ksah/>

By producing the *Abstract* in this format, the Editor and Policy Research staff are making the state's foremost collection of statistics easily available to the United States and the rest of the world.

I welcome suggestions concerning the new data and how PRI can improve the *Kansas Statistical Abstract*. Please address any correspondence to me at the Policy Research Institute, 607 Blake Hall, 1541 Lilac Lane, University of Kansas, Lawrence, Kansas 66044-3177, or call 785-864-105. *Average Per Farm is obtained by dividing Total Value of All Farmland by the number of farms.

Note: Beginning in 1975, a farm is defined as any place with annual sales of agricultural products of \$1,000 or more. Between 1959 and 1975 a farm was defined as a place of 10 or more acres that had annual sales of agricultural products of \$50 or more or a place of less than 10 acres that had annual sales of \$250 or more. Prior to 1959 a farm was defined as a place of three acres or more in size with a value of farm products amounting to \$150 or more. Places of less than three acres with sales of \$250 or more were also considered farms.

Figures are based on sales tax collections as reported by the KDOR State Sales Tax Collection annual summary report and listed in calendar years. Nominal sales are calculated by dividing the sales tax collection amount from each county by the state sales-tax rate. From nominal sales, real sales are found using the averaged CPI-U for the Midwest region, as reported by the U.S. Bureau of Labor Statistics.

* - Formerly known as the Scholastic Aptitude Test.

** Possible scores on each part of the SAT range from 200 to 800. Rankings of states based on SAT scores alone are invalid because of the varying proportions of students in each state taking the tests.

¹ Census 2000 terminology and categories are used for data on race. Because individuals could report only one race in the 1990 census and could report one or more race in the 2000 census, data on race for 1990 and 2000 are not comparable.

² Census 2000 terminology is used for ethnic categories. The corresponding term for "Hispanic or Latino" in the 1990 census was "Hispanic Origin."
