Searching for Data

Searching for data in PDF files is made easy using the **find** function. Clicking the **binocular icon** (shown above) opens the **Acrobat Find window** (shown below) and allows you to enter one or more words. After entering your text, click the **Find** button (circled below). The find function then searches the entire document stopping at the first point in the document where it locates your text. If this occurrence is not the page or data you were seeking, you can use the **find again** function (the smaller binocular icon shown above) to find the next point in the document where your text is located.

Practical uses of the find function include entering a city or county name to locate all pages that contain data for that city or county or searching by keyword to find data on a specific topic.

*Average Per Farm is obtained by dividing Total Value of All Farmland by the number of farms.

Note: Beginning in 1975, a farm is defined as any place with annual sales of agricultural products of \$1,000 or more. Between 1959 and 1975 a farm was defined as a place of 10 or more acres that had annual sales of agricultural products of \$50 or more or a place of less than 10 acres that had annual sales of \$250 or more. Prior to 1959 a farm was defined as a place of three acres or more in size with a value of farm products amounting to \$150 or more. Places of less than three acres with sales of \$250 or more were also considered farms.

Figures are based on sales tax collections as reported by the KDOR State Sales Tax Collection annual summary report and listed in calendar years. Nominal sales are calculated by dividing the sales tax collection amount from each county by the state sales-tax rate. From nominal sales, real sales are found using the averaged CPI-U for the Midwest region, as reported by the U.S. Bureau of Labor Statistics.

¹ Census 2000 terminology and categories are used for people reporting one race. Individuals could report only one race in the 1990 census and could select one or more races in the 2000 census; therefore, data on race for 1990 and 2000 are not comparable.

² Census 2000 terminology are used for ethnic categories. The corresponding term for "Hispanic or Latino" in the 1990 census was "Hispanic Origin."
