## Tips for Using the Kansas Statistical Abstract

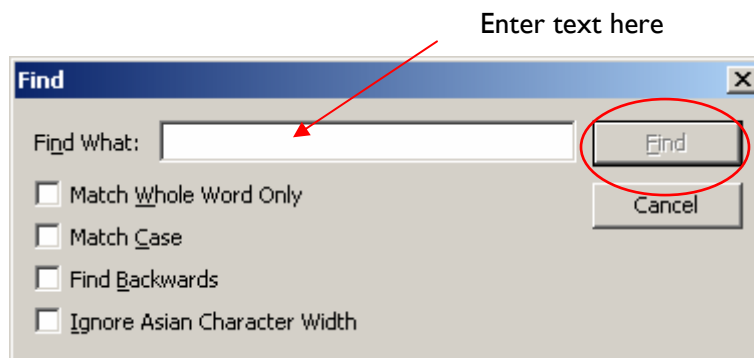

### Accessing the Online Edition

If you have a slow internet connection or access the Online Edition frequently, save the file to your hard drive to avoid downloading the file each time you need data.

To save the Online Edition to your hard drive, access the publication online, click the **diskette icon** (shown above), and specify a location on your computer to save the file. The Online Edition is offered at no cost, so feel free to download or save it as often as needed. **Librarians:** Please feel free to download and save the Kansas Statistical Abstract on all user terminals for fast, convenient access for library patrons.

### Searching for Data

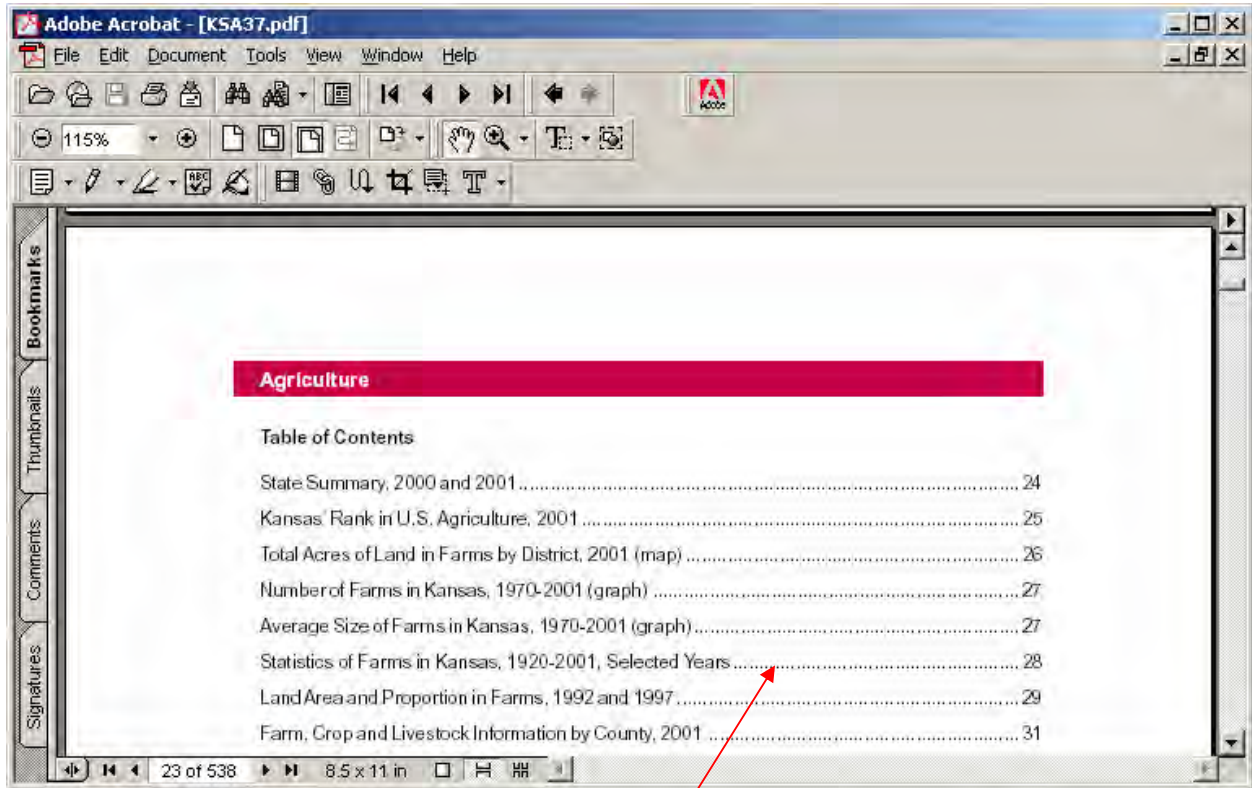

Searching for data in PDF files is made easy using the **find** function. Clicking the **binocular icon** (shown above) opens the **Acrobat Find window** (shown below) and allows you to enter one or more words. After entering your text, click the **Find** button (circled below). The find function then searches the entire document stopping at the first point in the document where it locates your text. If this occurrence is not the page or data you were seeking, you can use the **find again** function (the smaller binocular icon shown above) to find the next point in the document where your text is located.

**Tip:** Practical uses of the find function include entering a city or county name to locate all pages that contain data for that city or county or searching by keyword to find data on a specific topic.

Beginning in 1975, a farm is defined as any place with annual sales of agricultural products of \$1,000 or more. Between 1959 and 1975 a farm was defined as a place of 10 or more acres that had annual sales of agricultural products of \$50 or more or a place of less than 10 acres that had annual sales of \$250 or more. Prior to 1959 a farm was defined as a place of three acres or more in size with a value of farm products amounting to \$150 or more. Places of less than three acres with sales of \$250 or more were also considered farms.

\* Average per Farm is obtained by dividing Total Value of All Farmland by the Number of Farms.

Single dash (-) indicates suppressed when publications standards are not met, such as, the firm count is less than 3, or the relative standard error of the sales and receipts is 50 percent or more.

Double dash (--) indicates withheld to avoid disclosing data of individual companies; data is included in higher level totals.

Data suppression is based on employment size. Suppression codes: a=0-19 employees; f=500-999 employees; and g=1,000-2,499 employees.

Data may not sum to totals due to rounding.

<sup>1</sup> Nominal sales are calculated by dividing the sales tax collection amount from each county by the state sales tax rate.

<sup>2</sup> From nominal sales, real sales are calculated using the average CPI-U for the Midwest region as reported by the U.S. Bureau of Labor Statistics.

<sup>3</sup> Kansas includes miscellaneous taxable retail sales.

The SAT was formerly known as the Scholastic Assessment Test and the Scholastic Aptitude Test. Score averages are for college-bound Seniors. Possible scores on each part of the SAT range from 200 to 800. Rankings of states based on SAT scores alone are invalid because of the varying portions of students in each state taking the tests.

<sup>1</sup> Census 2000 terminology and categories are used for people reporting one race. Individuals could report only one race in the 1990 census and could select one or more races in the 2000 census; therefore, the data on race for 1990 and 2000 are not comparable.

<sup>2</sup> Census 2000 terminology are used for ethnic categories. The corresponding term for "Hispanic or Latino" in the 1990 census was "Hispanic Origin."
