Preface

We are pleased to present this 51st Edition of the *Kansas Statistical Abstract* (KSA). For 51 years, first in print and now on-line, the KSA has provided the people of Kansas up-to-date, relevant and accessible social, economic, and demographic data. This quote from the first edition of the KSA is still relevant today.

“As regional economic and social statistics become more prevalent so do the number of sources disseminating such information. The utility of these statistics depends to a great extent on an awareness of the various sources containing them and their accessibility. Often, even under the best of conditions, it is difficult to know if and where particular regional statistics exist.

The purpose of this volume is to present in a concise and convenient format important social and economic data pertaining to the State of Kansas. These data have been obtained and compiled from a number of different sources. Their potential usefulness should be increased as a result of consolidating them into one volume.”

--David L. Huff, Director, Center for Regional Studies, *Kansas Statistical Abstract 1965*

The KSA is compiled and published annually by The University of Kansas Institute for Policy & Social Research (IPSR). IPSR is a research center that supports all aspects of policy-relevant, social science research at the University of Kansas.

We extend a thank you to the many agencies that provided data for the KSA, either personally or by making their data readily available on the internet. Sources for each table or graphical representation are noted herein. We thank IPSR student assistants Taylor Moreno and Mackenzie Aden who provided assistance with data entry and table preparation. We acknowledge and thank Potomac Indexing, LLC, for indexing services.

We hope this edition of the *Kansas Statistical Abstract* will serve as a valuable resource. Please let us know if there are ways we can increase its value.

On behalf of IPSR,

Steven Maynard Moody, Director

The find function then searches the entire document marking each point in the document where it locates your text.

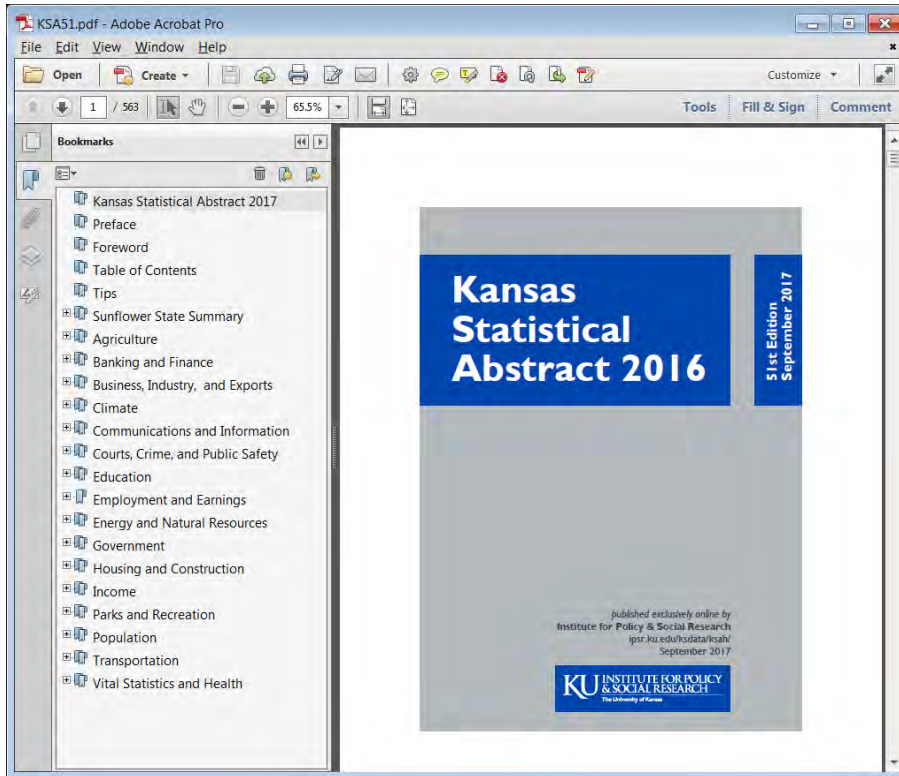

Tip: Practical uses of the find function include entering a city or county name to locate all pages that contain data for that city or county or searching by keyword to find data on a specific topic.

Zoom Tool

The **zoom** tool in Adobe Acrobat will allow you to zoom in or out on any page. The zoom in feature may be especially useful on some maps.

Table of Contents

The Table of Contents panel contains links to each individual section or chapter in the *Kansas Statistical Abstract*. Click the + symbol next to any chapter to expand the list of the tables in the chapter. Then click on the title of the table to automatically go to that table in the document.

Limitations of the Data

Some data in the *Kansas Statistical Abstract* are subject to sampling variability; see source for complete methodology and sampling information.

Data from the American Community Survey are associated with a 90% margin of error. We recommend calculating the coefficient of variation to determine the relative amount of sampling error for an estimate and using the following guidelines:

Coefficient of Variation (CV)	Reliability
Less than 12%	Reasonably reliable
12–40%	Use with caution
Greater than 40%	Do not use

Calculating the Coefficient of Variation (CV)

$$CV = ((MOE_{ACS} / 1.645) / EST_{ACS}) * 100$$

where MOE_{ACS} is the 90% margin of error and EST_{ACS} is the data estimate.

*The "No New Sentence" categories include a significant number of cases in which the offender was officially returned with no new sentence, but actually had been convicted of a new felony offense, the date of offense for which was before the return to prison. Documentation for the new sentence did not become available until after the offender was admitted.
