PREFACE

We are pleased to present this 58th Edition of the *Kansas Statistical Abstract* (KSA). The KSA is compiled and published annually by the University of Kansas Institute for Policy & Social Research (IPSR).

The KSA Editorial Board thanks the many agencies that provided data for the KSA by request or by making their data readily available online. Sources for each table and graph are noted herein.

The KSA Editorial Board thanks Benjy Jacobs, Kinbati Melaye, Maritzah Welton, Bryce Erickson, and Lindsey Hornberger for their assistance with data entry, table preparation, and editing. Thanks to Mad Marshall and Jane Makela for work on the cover and chapter covers.

The KSA reflects IPSR's commitment, as the lead agency of the Kansas State Data Center, to compiling and publishing data on the state for free public use. We hope this edition of the KSA will be a valuable resource. Please let us know if there are ways we can improve the KSA.

On behalf of the Editorial Board,

A handwritten signature in blue ink that reads "Jena Gunter". The signature is written in a cursive style with a large initial "J".

Bookmarks

The Bookmarks panel contains links to each individual section or chapter in the *Kansas Statistical Abstract*. Click the > symbol next to any chapter to expand the list of the tables in the chapter. Then click on the title of the table to automatically go to that table in the document.

Limitations of the Data

Some data in the *Kansas Statistical Abstract* are subject to sampling variability; see source for complete methodology and sampling information.

Data from the American Community Survey are associated with a 90% margin of error. We recommend calculating the coefficient of variation to determine the relative amount of sampling error for an estimate and using the following guidelines:

Coefficient of Variation (CV)	Reliability
Less than 12%	Reasonably reliable
12–40%	Use with caution
Greater than 40%	Do not use

Calculating the Coefficient of Variation (CV):

$$CV = ((MOE_{ACS} / 1.645) / EST_{ACS}) * 100$$

where MOE_{ACS} is the 90% margin of error and EST_{ACS} is the data estimate.
